Closed Sales

The number of sales transactions which closed during the month

Economists' note : Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

Month	Closed Sales	Percent Change Year-over-Year
Year-to-Date	3,218	-12.4%
April 2023	903	-9.2%
March 2023	970	-8.2%
February 2023	760	-11.5%
January 2023	585	-23.2%
December 2022	768	-26.3%
November 2022	627	-35.4%
October 2022	831	-22.3%
September 2022	844	-16.1%
August 2022	947	-11.4%
July 2022	867	-16.9%
June 2022	1,077	-7.8%
May 2022	1,015	1.8%
April 2022	995	-9.5%

this statistic should be interpreted with care.

	1		

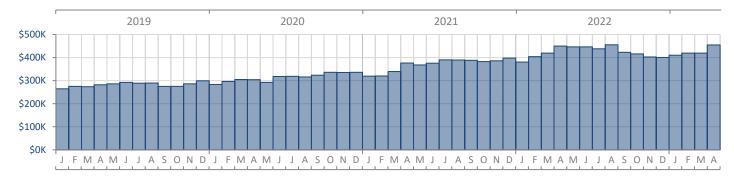

Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

Economists' note : Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
Year-to-Date	\$427,515	2.8%
April 2023	\$454,850	1.1%

May 2022	\$446,047	21.3%
April 2022	\$449,996	19.6%

Median Sale Price

Average Sale Price

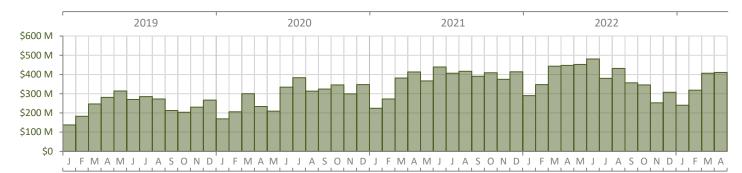

Dollar Volume

The sum of the sale prices for all sales which closed during the month _____

Economists' note : Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
Year-to-Date	\$1.4 Billion	-10.0%
April 2023	\$410.7 Million	-8.3%
March 2023	\$406.5 Million	-8.3%

May 2022	\$452.7 Million	23.5%
April 2022	\$447.7 Million	8.3%

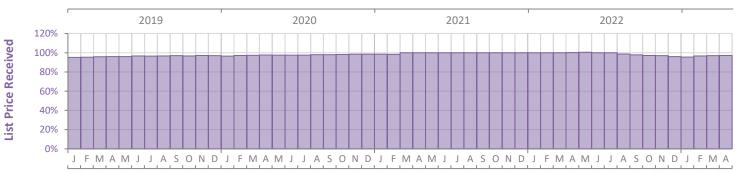

Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

Economists' note : The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Month	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year

Med. Pct. of Orig.

Median Time to Percent Change Median Time to Contract Month The median number of days between the listing date and contract date for all Closed Sales during the month Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures

the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

month	Contract	Year-over-Year

June 2022	9 Days	12.5%
May 2022	8 Days	0.0%
April 2022	7 Days	-30.0%

Median Time to

The median number of days between the listing date and closing date for all Closed Sales during the month

Economists' note : Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took more time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Month	Median Time to Sale	Percent Change Year-over-Year
Year-to-Date	81 Days	65.3%
April 2023	68 Days	54.5%
March 2023	71 Days	51.1%

New Listings The number of properties put onto the market during the month

availability of financing for homebuyers and the inventory of

Economists' note : New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

New Listings

Inventory (Active Listings)MonthThe number of property listings active at the end of
the monthApril 2023Economists' note : There are a number of ways to define and calculate
Inventory. Our method is to simply count the number of active listings
on the last day of the month and hold this number to compare with theMonthMonthYTD (Monthly AApril 2023January 2023January 2023December 2022October 2022

on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Month	Inventory	Percent Change Year-over-Year
YTD (Monthly Avg)	1,802	125.5%
April 2023	1,681	91.0%
March 2023	1,748	145.5%
February 2023	1,827	130.1%
January 2023	1,950	140.7%
December 2022	1,948	117.7%
November 2022	2,063	112.7%
October 2022	2,088	99.6%
September 2022	1,872	78.5%
August 2022	1,853	64.9%
July 2022	1,799	64.6%
June 2022	1,466	57.5%
May 2022	1,052	36.1%
April 2022	880	5.6%

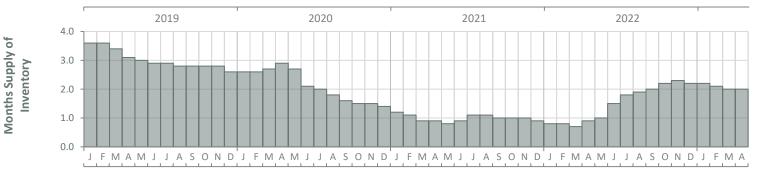

Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Economists' note : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

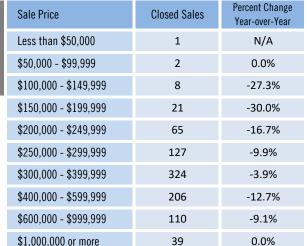

Month	Months Supply	Percent Change Year-over-Year
YTD (Monthly Avg)	2.1	162.5%
April 2023	2.0	122.2%
March 2023	2.0	185.7%
February 2023	2.1	162.5%
