

Summary Statistics	2024	2023	Percent Change Year-over-Year
Closed Sales	2,160	2,406	-10.2%
Paid in Cash	1,111	1,332	-16.6%
Median Sale Price	\$295,000	\$297,500	-0.8%
Average Sale Price	\$359,712	\$353,648	1.7%
Dollar Volume	\$777.0 Million	\$850.9 Million	-8.7%
Median Percent of Original List Price Received	94.1%	96.0%	-2.0%
Median Time to Contract	57 Days	27 Days	111.1%
Median Time to Sale	92 Days	63 Days	46.0%
New Pending Sales	2,272	2,475	-8.2%
New Listings	3,529	3,283	7.5%
Pending Inventory	167	208	-19.7%
Inventory (Active Listings)	1,226	921	33.1%
Months Supply of Inventory	6.8	4.6	47.8%

Closed Sales The number of sales transactions which closed during the year

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales.

Year	Closed Sales	Percent Change Year-over-Year
2024	2,160	-10.2%
2023	2,406	-11.4%
2022	2,716	-19.5%
2021	3,373	16.2%
2020	2,902	0.9%
2019	2,876	1.9%

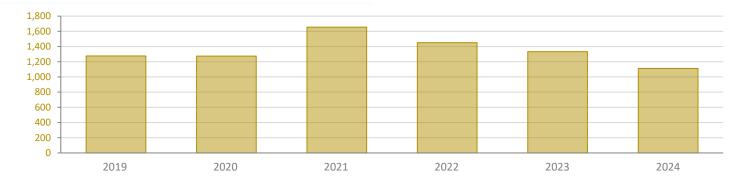

Cach Sales

The number of Closed Sales during the year in which
buyers exclusively paid in cash

Economists' note: Cash Sales can be a useful indicator of the extent to which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Year	Cash Sales	Year-over-Year
2024	1,111	-16.6%
2023	1,332	-8.1%
2022	1,450	-12.3%
2021	1,654	29.8%
2020	1,274	-0.1%
2019	1,275	-11.2%

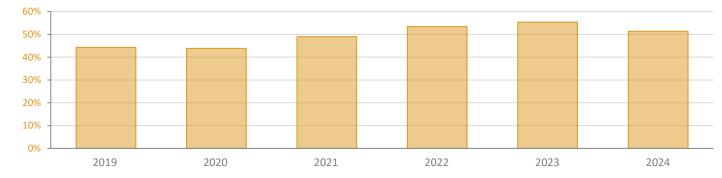

Cash Sales as a Percentage of Closed Sales The percentage of Closed Sales during the year which were Cash Sales

Economists' note: This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each year involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Year	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year
2024	51.4%	-7.2%
2023	55.4%	3.7%
2022	53.4%	9.0%
2021	49.0%	11.6%
2020	43.9%	-0.9%
2019	44.3%	-13.0%

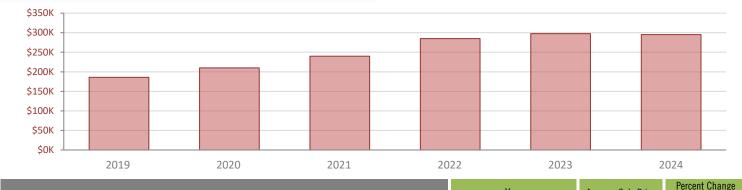

Mediali Sale Price	
The median sale price reported for the year (i.e. 5	0% o

sales were above and 50% of sales were below)

Economists' note: Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each year, and the mix of the types of homes that sell can change over time.

Year	Median Sale Price	Percent Change Year-over-Year
2024	\$295,000	-0.8%
2023	\$297,500	4.4%
2022	\$285,000	18.8%
2021	\$240,000	14.3%
2020	\$210,000	13.1%
2019	\$185,750	7.4%

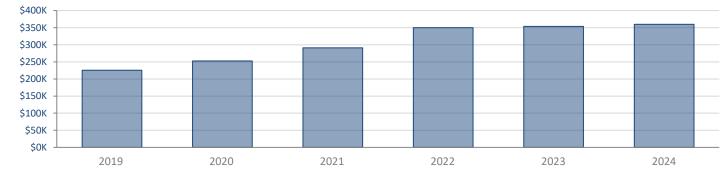

Average Sale Price

The average sale price reported for the year (i.e. total sales in dollars divided by the number of sales)

Economists' note: Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Average Sale Price	Year-over-Year
\$359,712	1.7%
\$353,648	1.1%
\$349,939	20.2%
\$291,042	15.2%
\$252,582	12.0%
\$225,541	7.8%
	\$359,712 \$353,648 \$349,939 \$291,042 \$252,582

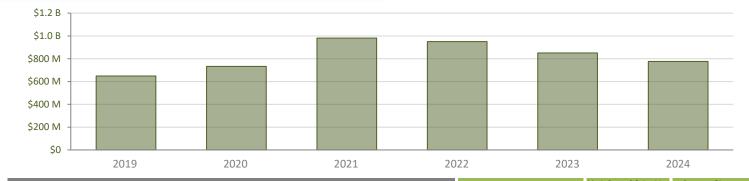

Dollar Volullic	
The sum of the sale prices for all sales which closed	
during the year	

Economists' note: Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Year	Dollar Volume	Percent Change Year-over-Year
2024	\$777.0 Million	-8.7%
2023	\$850.9 Million	-10.5%
2022	\$950.4 Million	-3.2%
2021	\$981.7 Million	33.9%
2020	\$733.0 Million	13.0%
2019	\$648.7 Million	9.9%

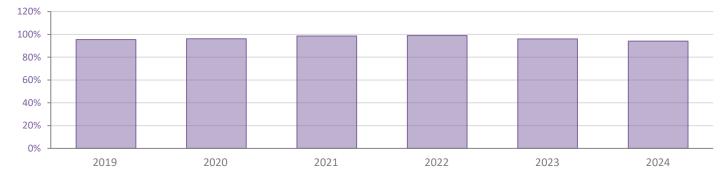

Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the year

Economists' note: The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Year	Price Received	Year-over-Year
2024	94.1%	-2.0%
2023	96.0%	-2.9%
2022	98.9%	0.4%
2021	98.5%	2.4%
2020	96.2%	0.7%
2019	95.5%	0.0%

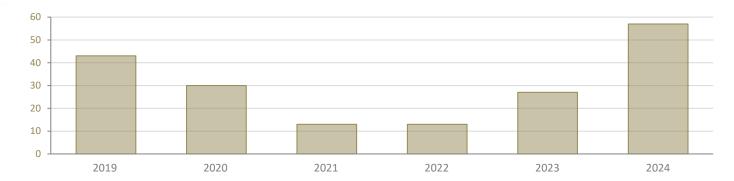

Median	Time to	Contract
--------	---------	----------

The median number of days between the listing date and contract date for all Closed Sales during the year

Economists' note: Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the year. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Year	Median Time to Contract	Percent Change Year-over-Year
2024	57 Days	111.1%
2023	27 Days	107.7%
2022	13 Days	0.0%
2021	13 Days	-56.7%
2020	30 Days	-30.2%
2019	43 Days	38.7%

Median Time to Contract

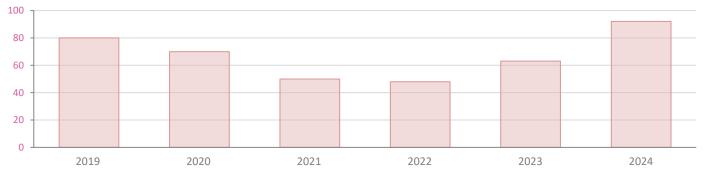

Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the year

Economists' note: Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Year	Median Time to Sale	Year-over-Year
2024	92 Days	46.0%
2023	63 Days	31.3%
2022	48 Days	-4.0%
2021	50 Days	-28.6%
2020	70 Days	-12.5%
2019	80 Days	17.6%

edian Time to Sal

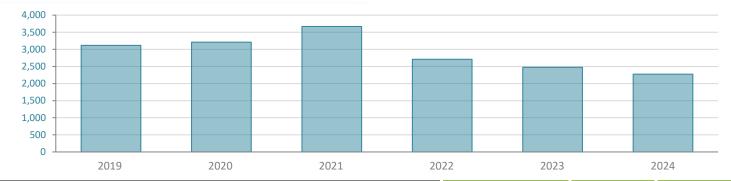

New I challing Sales	
The number of listed properties	that went under
contract during the year	

Economists' note: Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

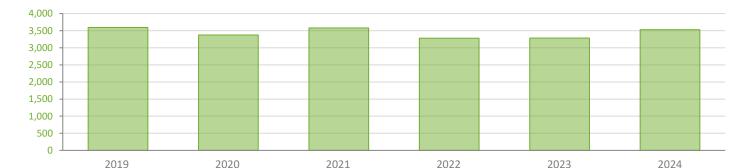

Year	New Pending Sales	Percent Change Year-over-Year
2024	2,272	-8.2%
2023	2,475	-8.6%
2022	2,707	-26.2%
2021	3,670	14.3%
2020	3,211	3.1%
2019	3,114	2.6%

New Listings The number of properties put onto the market during the year

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Year	New Listings	Percent Change Year-over-Year
2024	3,529	7.5%
2023	3,283	0.1%
2022	3,280	-8.4%
2021	3,581	6.1%
2020	3,374	-6.1%
2019	3,592	-2.6%

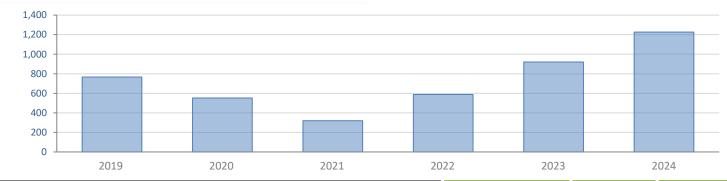

Invantary (Nativa Listings)

inventory (Active Listings)
The number of property listings active at the end of
the year

Economists' note: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the year, since it is the most current. Inventory rises when New Listings are outpacing the number of listings that go offmarket (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Year	Inventory	Percent Change Year-over-Year
2024	1,226	33.1%
2023	921	56.6%
2022	588	83.8%
2021	320	-42.0%
2020	552	-28.0%
2019	767	-15.2%

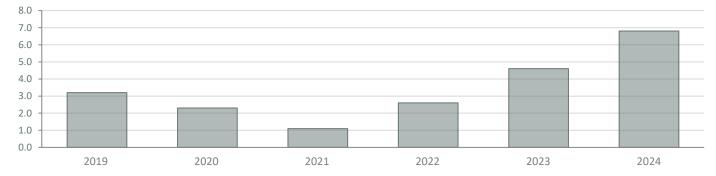

Months Supply of Inventory (Year-End)

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Economists' note: MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Year	Months Supply	Percent Change Year-over-Year
2024	6.8	47.8%
2023	4.6	76.9%
2022	2.6	136.4%
2021	1.1	-52.2%
2020	2.3	-28.1%
2019	3.2	-15.8%

Closed Sales by Sale Price

The number of sales transactions which closed during the year

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales.

Sale Price	Closed Sales	Percent Change Year-over-Year
Less than \$50,000	26	8.3%
\$50,000 - \$99,999	15	-55.9%
\$100,000 - \$149,999	186	2.8%
\$150,000 - \$199,999	320	-6.2%
\$200,000 - \$249,999	290	-16.2%
\$250,000 - \$299,999	285	-6.6%
\$300,000 - \$399,999	387	-19.0%
\$400,000 - \$599,999	420	-5.4%
\$600,000 - \$999,999	161	-15.3%
\$1,000,000 or more	70	11.1%

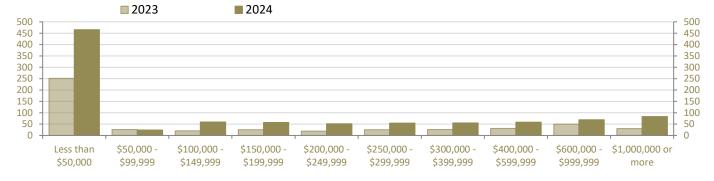

Median Time to Contract by Sale Price

The median number of days between the listing date and contract date for all Closed Sales during the year

Economists' note: Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the year. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Sale Price	Median Time to Contract	Percent Change Year-over-Year
Less than \$50,000	465 Days	85.3%
\$50,000 - \$99,999	24 Days	-7.7%
\$100,000 - \$149,999	59 Days	195.0%
\$150,000 - \$199,999	57 Days	128.0%
\$200,000 - \$249,999	51 Days	168.4%
\$250,000 - \$299,999	54 Days	116.0%
\$300,000 - \$399,999	55 Days	111.5%
\$400,000 - \$599,999	58 Days	87.1%
\$600,000 - \$999,999	69 Days	38.0%
\$1,000,000 or more	83 Days	176.7%

New Listings by Initial Listing Price

The number of properties put onto the market during the year

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Initial Listing Price	New Listings	Percent Change Year-over-Year
Less than \$50,000	4	0.0%
\$50,000 - \$99,999	20	-47.4%
\$100,000 - \$149,999	192	4.9%
\$150,000 - \$199,999	488	7.5%
\$200,000 - \$249,999	491	9.8%
\$250,000 - \$299,999	426	8.1%
\$300,000 - \$399,999	641	3.1%
\$400,000 - \$599,999	775	19.6%
\$600,000 - \$999,999	371	10.1%
\$1,000,000 or more	121	-22.4%

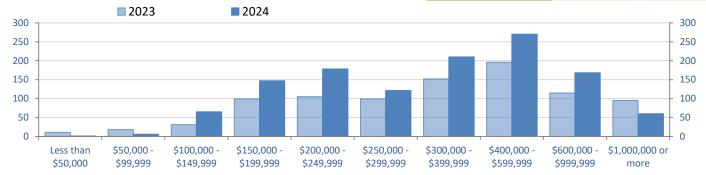

Inventory by Current Listing Price

The number of property listings active at the end of the year

Economists' note: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the year, since it is the most current. Inventory rises when New Listings are outpacing the number of listings that go offmarket (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Current Listing Price	Inventory	Percent Change Year-over-Year
Less than \$50,000	1	-90.9%
\$50,000 - \$99,999	6	-66.7%
\$100,000 - \$149,999	65	109.7%
\$150,000 - \$199,999	147	48.5%
\$200,000 - \$249,999	178	69.5%
\$250,000 - \$299,999	121	22.2%
\$300,000 - \$399,999	210	38.2%
\$400,000 - \$599,999	270	37.8%
\$600,000 - \$999,999	168	46.1%
\$1,000,000 or more	60	-36.8%

Yearly Distressed Market - 2024 Townhouses and Condos Brevard County
