Pending Inventory	537	496	8.3%
Inventory (Active Listings)	1,152	1,199	-3.9%
Months Supply of Inventory	5.0	4.9	2.0%

Closed Sales The number of sales transactions which closed during the quarter

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a quarter's sales to the amount of sales in the same quarter in the previous year), rather than changes from one quarter to the next.

Closed Sales

Quarter	Closed Sales	Percent Change Year-over-Year
Q2 2016	772	-12.8%
Q1 2016	592	-12.0%
Q4 2015	601	-12.9%
Q3 2015	786	12.9%
Q2 2015	885	6.8%
Q1 2015	673	7.5%
Q4 2014	690	8.7%
Q3 2014	696	-5.3%
Q2 2014	829	8.8%
Q1 2014	626	9.8%
Q4 2013	635	7.6%
Q3 2013	735	28.0%
Q2 2013	762	10.4%

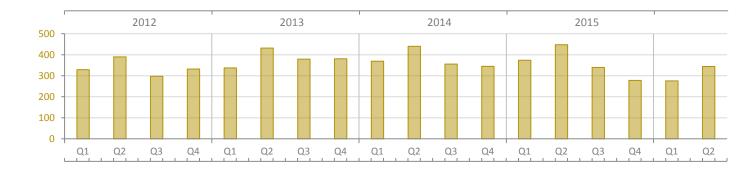

Cash Sales	Quarter	Cash Sales	Percent Change Year-over-Year
	Q2 2016	344	-23.2%
The number of Closed Sales during the quarter in	Q1 2016	276	-26.2%
which buyers exclusively paid in cash	Q4 2015	278	-19.4%
which buyers exclusivery pull in cush	Q3 2015	340	-4.5%
	Q2 2015	448	1.8%
	Q1 2015	374	1.4%
<i>Economists' note</i> : Cash Sales can be a useful indicator of the extent to	04 2014	345	-9.4%

which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Quarter	Cash Sales	Year-over-Year
Q2 2016	344	-23.2%
Q1 2016	276	-26.2%
Q4 2015	278	-19.4%
Q3 2015	340	-4.5%
Q2 2015	448	1.8%
Q1 2015	374	1.4%

Q3 2014	356	-6.1%
Q2 2014	440	1.9%
Q1 2014	369	9.5%
Q4 2013	381	14.8%
Q3 2013	379	27.2%
Q2 2013	432	10.8%

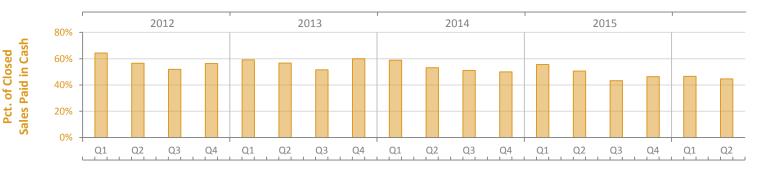

Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the quarter which were Cash Sales

Economists' note: This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each quarter involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Quarter	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year
Q2 2016	44.6%	-11.9%
Q1 2016	46.6%	-16.2%
Q4 2015	46.3%	-7.4%
Q3 2015	43.3%	-15.3%
Q2 2015	50.6%	-4.7%
Q1 2015	55.6%	-5.6%
Q4 2014	50.0%	-16.7%
Q3 2014	51.1%	-1.0%
Q2 2014	53.1%	-6.3%
Q1 2014	58.9%	-0.3%
Q4 2013	60.0%	6.6%
Q3 2013	51.6%	-0.6%
Q2 2013	56.7%	0.4%

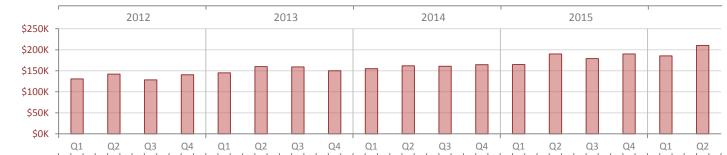

Median Sale Price

The median sale price reported for the quarter (i.e. 50% of sales were above and 50% of sales were below)

Economists' note : Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each quarter, and the mix of the types of homes that sell can change over time.

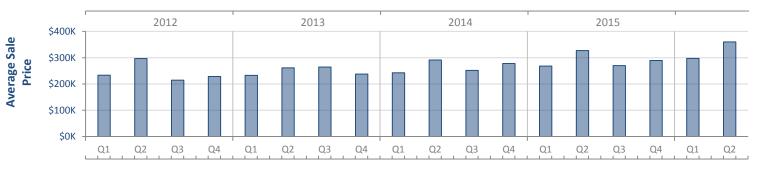

Average Sale Price

The average sale price reported for the quarter (i.e. total sales in dollars divided by the number of sales)

Economists' note : Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Quarter	Average Sale Price	Percent Change Year-over-Year
Q2 2016	\$360,202	10.1%
Q1 2016	\$297,473	10.8%
Q4 2015	\$289,386	4.1%
Q3 2015	\$269,852	7.1%
Q2 2015	\$327,281	12.4%
Q1 2015	\$268,364	10.7%
Q4 2014	\$277,963	17.0%
Q3 2014	\$251,849	-4.8%
Q2 2014	\$291,206	11.4%
Q1 2014	\$242,332	4.1%
Q4 2013	\$237,657	4.1%
Q3 2013	\$264,523	23.3%
Q2 2013	\$261,463	-11.9%

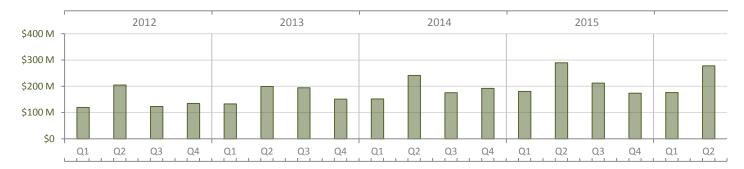

Paraant Char Dollar Volume The sum of the sale prices for all sales which closed during the quarter *Economists' note* : Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying

Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Dollar Volume	Year-over-Year
\$278.1 Million	-4.0%
\$176.1 Million	-2.5%
\$173.9 Million	-9.3%
\$212.1 Million	21.0%
\$289.6 Million	20.0%
\$180.6 Million	19.1%
\$191.8 Million	27.1%
\$175.3 Million	-9.8%
\$241.4 Million	21.2%
\$151.7 Million	14.3%
\$150.9 Million	12.1%
\$194.4 Million	57.9%
\$199.2 Million	-2.7%
	\$278.1 Million \$176.1 Million \$173.9 Million \$212.1 Million \$289.6 Million \$180.6 Million \$191.8 Million \$175.3 Million \$241.4 Million \$151.7 Million \$150.9 Million

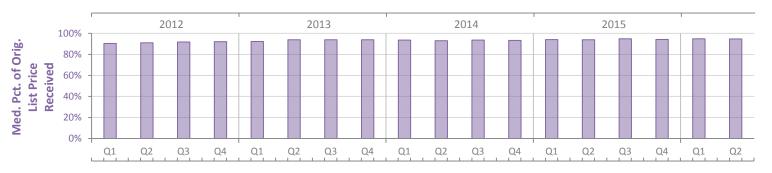

Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the quarter

Economists' note : The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Quarter	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
Q2 2016	94.7%	0.7%
Q1 2016	94.9%	0.9%
Q4 2015	94.3%	1.0%
Q3 2015	94.8%	1.3%
Q2 2015	94.0%	1.0%
Q1 2015	94.1%	0.4%
Q4 2014	93.4%	-0.5%
Q3 2014	93.6%	-0.4%
Q2 2014	93.1%	-1.0%
Q1 2014	93.7%	1.5%
Q4 2013	93.9%	2.0%
Q3 2013	94.0%	2.3%
Q2 2013	94.0%	3.3%

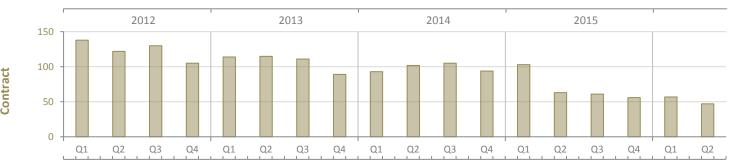

Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the quarter

Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the quarter. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

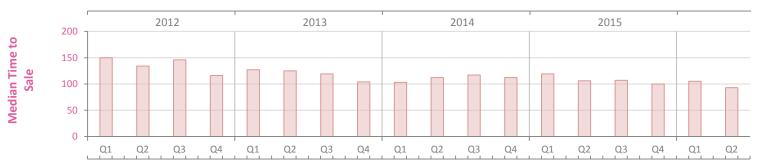

Median Time to Sale

Median Time to

The median number of days between the listing date and closing date for all Closed Sales during the quarter

Economists' note : Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this quarter was on the market. That is, 50% of homes selling this quarter took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Quarter	Median Time to Sale	Percent Change Year-over-Year
Q2 2016	93 Days	-12.3%
Q1 2016	105 Days	-11.8%
Q4 2015	100 Days	-10.7%
Q3 2015	107 Days	-8.5%
Q2 2015	106 Days	-5.4%
Q1 2015	119 Days	15.5%
Q4 2014	112 Days	7.7%
Q3 2014	117 Days	-1.7%
Q2 2014	112 Days	-10.4%
Q1 2014	103 Days	-18.9%
Q4 2013	104 Days	-10.3%
Q3 2013	119 Days	-18.5%
Q2 2013	125 Days	-6.7%

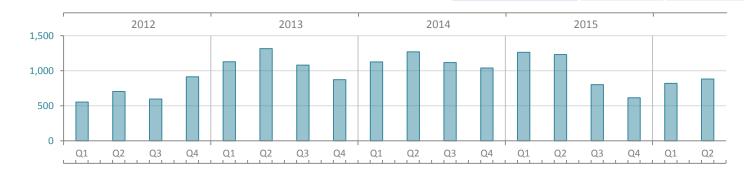

New Pending SalesQuarterThe number of listed properties that went under
contract during the quarterQ1 2016Q4 2015Q3 2015Q2 2015Q2 2015

Economists' note : Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

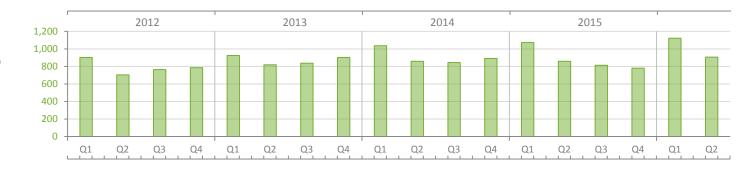

New Listings The number of properties put onto th

The number of properties put onto the market during the quarter

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Quarter	New Listings	Percent Change Year-over-Year
Q2 2016	906	5.5%
Q1 2016	1,122	4.7%
Q4 2015	781	-12.3%
Q3 2015	814	-3.6%
Q2 2015	859	0.0%
Q1 2015	1,072	3.4%
Q4 2014	891	-1.2%
Q3 2014	844	0.8%
Q2 2014	859	5.0%
Q1 2014	1,037	12.1%
Q4 2013	902	14.8%
Q3 2013	837	9.6%
Q2 2013	818	16.2%

Produced by Florida REALTORS® with data provided by Florida's multiple listing services. Statistics for each month compiled from MLS feeds on the 15th day of the following month. New Listings

Inventory (Active Listings)QuarterThe number of property listings active at the end of
the quarterQ1 2016
Q1 2015
Q3 2015Economists' note : There are a number of ways to define and calculateQ2 2015
Q1 2015Q2 2015
Q2 2015Q2 2015
Q1 2015

Inventory. Here, we simply count the number of active listings on the last day of the quarter, and hold this number to compare with the same quarter the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

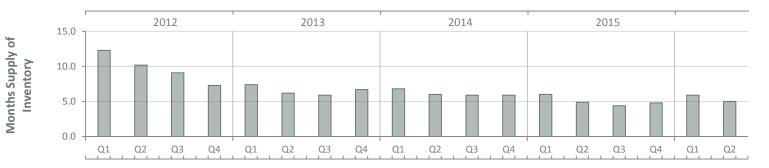

Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Economists' note : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Quarter	Months Supply	Percent Change Year-over-Year
Q2 2016	5.0	2.0%
Q1 2016	5.9	-1.7%
Q4 2015	4.8	-18.6%
Q3 2015	4.4	-25.4%
Q2 2015	4.9	-18.3%
Q1 2015	6.0	-11.8%
Q4 2014	5.9	-11.9%
Q3 2014	5.9	0.0%
Q2 2014	6.0	-3.2%
Q1 2014	6.8	-8.1%
Q4 2013	6.7	-8.2%
Q3 2013	5.9	-35.2%
Q2 2013	6.2	-39.2%

Closed Sales by Sale Price

The number of sales transactions which closed during the quarter

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a quarter's sales to the amount of sales in the same month in the previous year), rather than changes from one quarter to the next.

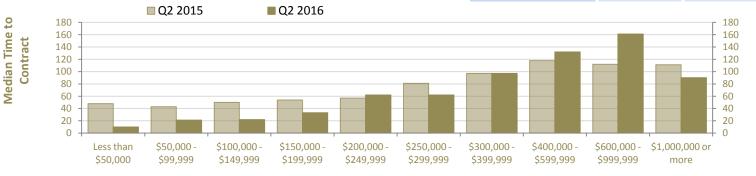

Sale Price	Closed Sales	Percent Change Year-over-Year
Less than \$50,000	4	-84.6%
\$50,000 - \$99,999	57	-47.2%
\$100,000 - \$149,9	999 150	-10.7%
\$150,000 - \$199,9	999 158	-1.3%
\$200,000 - \$249,9	999 116	7.4%
\$250,000 - \$299,9	999 67	-6.9%
\$300,000 - \$399,9	999 83	7.8%
\$400,000 - \$599,9	999 55	-30.4%
\$600,000 - \$999,9	999 40	-20.0%
\$1,000,000 or mor	re 42	13.5%

Median Time to Contract by Sale Price The median number of days between the listing date and contract date for all Closed Sales during the guarter

Economists' note : Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the quarter. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Sale Price	Median Time to Contract	Percent Change Year-over-Year
Less than \$50,000	10 Days	-79.2%
\$50,000 - \$99,999	21 Days	-51.2%
\$100,000 - \$149,999	22 Days	-56.0%
\$150,000 - \$199,999	33 Days	-38.9%
\$200,000 - \$249,999	62 Days	8.8%
\$250,000 - \$299,999	62 Days	-23.5%
\$300,000 - \$399,999	97 Days	0.0%
\$400,000 - \$599,999	132 Days	11.9%
\$600,000 - \$999,999	161 Days	43.8%
\$1,000,000 or more	90 Days	-18.9%

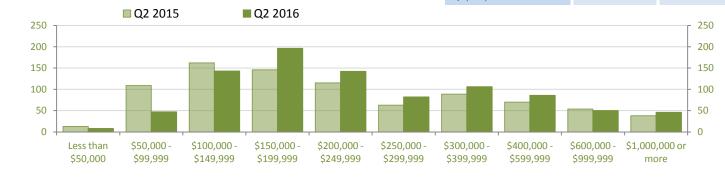

New Listings by Initial Listing Price The number of properties put onto the market during the quarter

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Initial Listing Price	New Listings	Percent Change Year-over-Year
Less than \$50,000	8	-38.5%
\$50,000 - \$99,999	47	-56.9%
\$100,000 - \$149,999	143	-11.7%
\$150,000 - \$199,999	196	34.2%
\$200,000 - \$249,999	142	23.5%
\$250,000 - \$299,999	82	30.2%
\$300,000 - \$399,999	106	19.1%
\$400,000 - \$599,999	86	22.9%
\$600,000 - \$999,999	50	-7.4%
\$1,000,000 or more	46	21.1%

Inventory by Current Listing Price The number of property listings active at the end of the quarter

Economists' note : There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the quarter, and hold this number to compare with the same quarter the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going offmarket.

Current Listing Price	Inventory	Percent Change Year-over-Year
Less than \$50,000	5	-54.5%
\$50,000 - \$99,999	43	-52.2%
\$100,000 - \$149,999	73	-41.1%
\$150,000 - \$199,999	138	2.2%
\$200,000 - \$249,999	135	-2.2%
\$250,000 - \$299,999	109	-4.4%
\$300,000 - \$399,999	136	-9.3%
\$400,000 - \$599,999	176	10.0%
\$600,000 - \$999,999	135	9.8%
\$1,000,000 or more	202	31.2%
