Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

Economists' note: Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
January 2017	\$239,441	15.0%
December 2016	\$232,350	13.4%
November 2016	\$227,059	8.6%

March 2016	\$207,038	7.9%
February 2016	\$202,367	5.1%
January 2016	\$208,256	17.4%

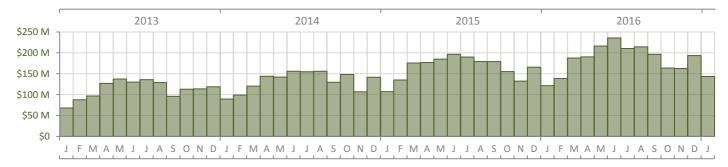

FloridaRealtors The Voice for Real Estate® in Florida

Dollar Volume

The sum of the sale prices for all sales which closed during the month

Economists' note : Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
January 2017	\$143.7 Million	18.1%
December 2016	\$193.5 Million	17.0%
November 2016	\$162.3 Million	22.7%
October 2016	\$163.4 Million	5.4%
September 2016	\$196.7 Million	9.8%
August 2016	\$214.2 Million	19.7%
July 2016	\$210.6 Million	10.9%
June 2016	\$235.4 Million	19.8%
May 2016	\$216.1 Million	17.0%
April 2016	\$190.3 Million	7.7%
March 2016	\$187.6 Million	6.8%
February 2016	\$138.4 Million	2.6%
January 2016	\$121.6 Million	13.5%

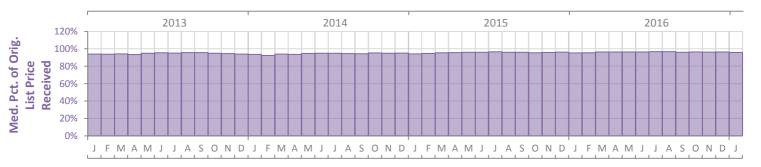

Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

Economists' note: The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Month	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
January 2017	95.8%	0.5%
December 2016	96.3%	0.2%
November 2016	96.2%	0.4%
October 2016	96.3%	0.8%
September 2016	95.9%	-0.1%
August 2016	96.7%	0.7%
July 2016	96.7%	0.2%
June 2016	96.4%	0.4%
May 2016	96.4%	0.5%
April 2016	96.3%	0.6%
March 2016	96.3%	0.8%
February 2016	95.5%	1.0%
January 2016	95.3%	1.2%

Median Time to Percent Change Month Median Time to Contract Contract Year-over-Year January 2017 35 Days -10.3% The median number of days between the listing date December 2016 -9.7% 28 Days November 2016 26 Days -16.1% and contract date for all Closed Sales during the month October 2016 26 Days -29.7% September 2016 27 Days -20.6% *Economists' note* : Like Time to Sale, Time to Contract is a measure August 2016 27 Days -20.6% of the length of the home selling process calculated for sales which July 2016 27 Days -12.9% closed during the month. The difference is that Time to Contract June 2016 28 Days -20.0% measures the number of days between the initial listing of a property May 2016 27 Days -22.9% and the signing of the contract which eventually led to the closing of April 2016 33 Days -19.5% the sale. When the gap between Median Time to Contract and Median March 2016 33 Days -8.3% Time to Sale grows, it is usually a sign of longer closing times and/or February 2016 41 Days -22.6% declining numbers of cash sales.

January 2016

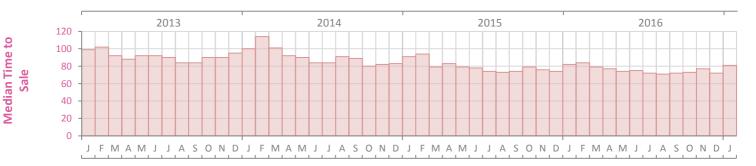

Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the month

Economists' note: Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Month	Median Time to Sale	Percent Change Year-over-Year
January 2017	81 Days	-1.2%
December 2016	72 Days	-2.7%
November 2016	77 Days	1.3%
October 2016	73 Days	-7.6%

August 2016	71 Days	-2.7%
July 2016	72 Days	-2.7%
June 2016	75 Days	-3.8%
May 2016	74 Days	-6.3%
April 2016	77 Days	-7.2%
March 2016	79 Days	0.0%
February 2016	84 Days	-10.6%
January 2016	82 Days	-9.9%

39 Days

New Pending Sales The number of listed properties that went under contract during the month *Economists' note* : Because of the typical length of time it takes for a

sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

Month	New Pending Sales	Percent Change Year-over-Year
January 2017	924	5.6%
December 2016	632	-6.4%
November 2016	692	-7.5%
October 2016	645	-25.6%
September 2016	863	4.9%
August 2016	981	2.2%
July 2016	963	1.5%
June 2016	947	-8.2%
May 2016	995	0.7%
April 2016	841	-19.8%
March 2016	1,066	-2.4%
February 2016	972	12.4%
January 2016	875	-9.7%

New Listings

The number of properties put onto the market during the month

Economists' note : New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really new listings.

Month	New Listings	Percent Change Year-over-Year
January 2017	1,119	16.0%
December 2016	705	-3.6%
November 2016	915	5.3%
October 2016	812	-21.5%
September 2016	903	5.6%
August 2016	1,007	7.4%
July 2016	947	-5.8%
June 2016	1,105	4.4%
May 2016	1,053	3.6%
April 2016	1,108	4.9%
March 2016	1,030	-1.0%
February 2016	1,060	15.1%
January 2016	965	-9.1%

New Listings

Inventory (Active Listings)

The number of property listings active at the end of the month

Economists' note: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go offmarket (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Month	Inventory	Percent Change Year-over-Year
January 2017	2,122	-10.0%
December 2016	2,002	-13.0%
November 2016	2,079	-11.8%
October 2016	1,954	-13.9%
September 2016	2,019	-7.2%
August 2016	2,040	-9.4%
July 2016	2,119	-9.3%
June 2016	2,189	-5.5%
May 2016	2,173	-6.5%
April 2016	2,467	7.4%
March 2016	2,231	-2.5%
February 2016	2,417	4.0%
January 2016	2,357	-7.9%

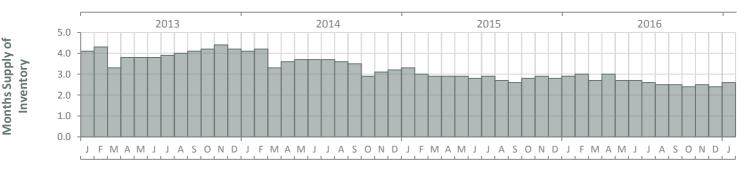

Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

Economists' note : MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12month average of monthly Closed Sales instead.

Month	Months Supply	Percent Change Year-over-Year
January 2017	2.6	-10.3%
December 2016	2.4	-14.3%
November 2016	2.5	-13.8%
October 2016	2.4	-14.3%
September 2016	2.5	-3.8%
August 2016	2.5	-7.4%
July 2016	2.6	-10.3%
June 2016	2.7	-3.6%
May 2016	2.7	-6.9%
April 2016	3.0	3.4%
March 2016	2.7	-6.9%
February 2016	3.0	0.0%
January 2016	2.9	-12.1%

Florida Real Estate® in Florida

Closed Sales by Sale Price

The number of sales transactions which closed during the month

Economists' note: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

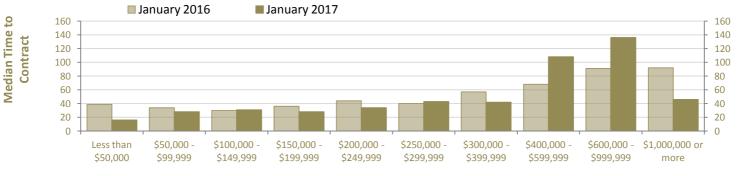

Sa	Ile Price	Closed Sales	Percent Change Year-over-Year
Le	ss than \$50,000	6	-76.0%
\$5	60,000 - \$99,999	46	-48.9%
