

AMERICAN LIFESTYLE

Happy Holidays!!!

My favorite time of the year!! I wanted to take the opportunity to connect and share this terrific gift as a thank you for your continued support through business and referrals. This publication of my magazine American lifestyle has celebration of flair and flavors of life!

Educating home buyers and sellers often favor a special Real Estate professional, who offers a unique combination of business and financial expertise. I pride myself on having that, and work using my talent. What separates me from other "real estate agents" is my background of 25 years of finance, Originator, Underwriter, modifying and managing teams of loan officers for large corporate Banks. I have worked as a subcontractor under the Dept. of Justice, underwriting their most intense files with most of the top well known banks in the United States, saving many homes in America during the BIG bubble!

I personally saved over 300 homes from foreclosure. My wealth of knowledge is very well utilized at times! I have surrounded myself with a network of the best trusted teams for any rising obstacle in selling or buying.

I hope you and your family and friends enjoy the Holidays, and allow me to provide great service to you in your future!

I would love to hear what you think of my magazine, please feel free to share! Enjoy the recipes I personally picked and the stories! Have a wonderful Holiday Season!!!

Thank you again for always keeping me in mind. And remember the best compliment is referring me as your realtor of choice to all your friends and family.
